Rob –

Not sure if you were hoping for ground shots or aerials but I was quickly able to locate on our set of 1936 aerial photos a shot of the Cienega Creek area and I believe I can place on that photo where the dam is located based on other nearby physiographic features. I've embedded the 2012 aerial of the area in this email for comparison purposes.

I saved that 1936 photo as a pdf and am attaching it to this email. Unfortunately it split onto 2 pages but you can see at the bottom of the first page a pinch point in the creek where it turns at an approximate 90 degree angle to the west. That appears to be the area of the dam.

I am copying Ken Maits from RFCD on this email as Ken manages our Information Management Section as he might be assist in locating additional historical photos of the area. Although we do have an aerial series from the 1940s, I do not believe they extend out this far. Let me know if questions. Regards, Chris

Hello Chris,

Thank you in taking the time to taking with me and Elizabeth and for sending this along; it has proved helpful in our ongoing discussions with the Corps. I was talking to Julia Fonseca today about the availability of historical images of Pantano Wash below the dam and she believes that Pima County Flood Control might have photos from the 1930s-1960s scanned and available. We would be interested in getting these photos, perhaps electronically, if available.

I realize that you have new duties now and are very busy. Perhaps you know of a contact with Pima County that might be able to assist us?

Thanks again,

Rob

Elizabeth – Attached is the latest plan for this proposed ILF site as discussed this morning.

Please let me know if questions and also please confirm receipt of this due to its fairly large size. Thanks, Chris
